

**IMPORTANT MESSAGE FROM CITRIX EDUCATION
REGARDING CITRIX EXAM 456**

January 23, 2007

To Citrix Education Customers:

Citrix Education has modified the scoring for Citrix Exam 456, “Citrix Access Suite 4.0: Build/Test,” based on post-release reviews of the exam that included candidate feedback, statistical data analysis, and input from subject matter experts.

While the exam performed as designed and tested, it was determined that the scoring logic was overly stringent. To correct this, Citrix Education changed the passing score from 62 to 56. Candidates who have been impacted by this change will receive a communication from Citrix Education with details by February 15, 2007.

The decision to lower the passing score is a continuation of Citrix Education’s focus on ensuring the new exam upholds the quality that Citrix demands of all its exams, while also being a fair measure of candidates’ abilities. For more information or questions on these changes, please contact us directly at training@citrix.com.
