- Over 40 applications have been certified for Windows Server 2008
- Certified more than 900 handsets with Mobile IM or Email clients for major telecom operators in Americas, Europe, Australia and APAC

Customer Commendations

Your Windows Vista Certification team at Wipro is nothing less than AMAZING ... to me this represents "ZERO HOURS" to certify a product at Wipro. I am absolutely delighted that we chose to work together with Wipro for all our Vista Certifications'.

- A Leader in icon editing software for Windows

Citrix Verification Process

Case Study

WS 2008 Certification for an ISV in Israel

Scope

- The ISV application certified for WS 2008 provides secure local & remote, centrally managed access to applications running on Windows Terminal Servers, Virtual Desktops and legacy host systems, via a Web browser
- The process of certification included installing of WS 2008 and the ISV application on a fresh machine
- Testing was covered for the areas of "Windows Fundamentals", "Install/Remove", "Security", "Reliability and High Availability"

Contribution

- Used an 8 Processor machine for testing the application as part of certification
- Helped the ISV to get a good understanding on Cluster and Stress testing
- Provided technical help on usage of tools
- The application is certified for WS 2008 logo after it passes all the test scenarios

Benefits to the Customer

- Quick turnaround of certification accelerated early product release in the market
- The product is listed officially at Microsoft site under Windows Market Catalog
- Certification helped the ISV with greater market recognition for the product's stability, security, reliability and availability
