Company Overview

Citrix Systems, Inc. (NASDAQ:CTXS) is the leading provider of virtualization, networking and software as a service technologies for more than 230,000 organizations worldwide. Its Citrix Delivery Center, Citrix Cloud Center (C3) and Citrix Online Services product families radically simplify computing for millions of users, delivering applications as an on-demand service to any user, in any location on any device. Citrix customers include the world's largest Internet companies, 99 percent of Fortune Global 500 enterprises, and hundreds of thousands of small businesses and prosumers worldwide. Citrix partners with over 10,000 companies worldwide in more than 100 countries. Founded in 1989, annual revenue in 2008 was \$1.6 billion.

Integration Overview

Citrix XenApp is an application virtualization solution that enables any Windows application to be centralized and managed in the datacenter and delivered as an on-demand service to users anywhere on any device. XenApp may reduce the cost of application management, increase IT responsiveness when delivering an application to distributed users and improves application and data security.

XenApp enables IT to centrally manage a single instance of each application and virtualize them for delivery to users for online and offline use, while providing a high definition experience.

Integration Details

XenApp 5 application delivery controllers are deployed in front of Oracle E-Business Suite Release 12.1 and should be viewed as the client platform in a standard Oracle E-Business Suite Release 12.1 configuration. XenApp clients then access XenApp-hosted sessions to interact with the Oracle E-Business Suite applications through a XenApp-hosted browser such as Internet Explorer, as documented in the software requirements section of the Oracle E-Business Suite Release 12.1 documentation.

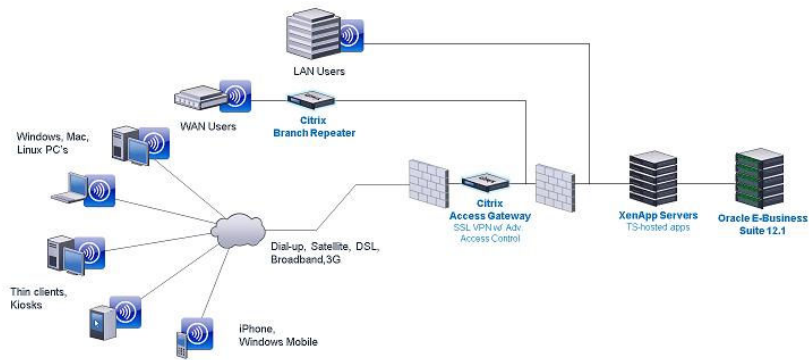

Validated Integration

Oracle E-Business Suite

Through the Oracle PartnerNetwork Application Integration Architecture for Partners Initiative, partners with validated integrations are able to provide customers with standards-based product integrations, tested and validated by Oracle. Customers benefit from improved risk management and smoother upgrade capability, leading to a lower total cost of ownership and greater overall satisfaction.
