The clear choice for desktop virtualization (VDI) and desktop management

Citrix XenDesktop 3 is the only virtual desktop solution that delivers a high definition user experience over any connection

Company Overview

Citrix Systems, Inc. (NASDAQ:CTXS) is the leading provider of virtualization, networking and software as a service technologies for more than 230,000 organizations worldwide. Its Citrix Delivery Center, Citrix Cloud Center (C3) and Citrix Online Services product families radically simplify computing for millions of users, delivering applications as an on-demand service to any user, in any location on any device. Citrix customers include the world's largest Internet companies, 99 percent of Fortune Global 500 enterprises, and hundreds of thousands of small businesses and prosumers worldwide. Citrix partners with over 10,000 companies worldwide in more than 100 countries. Founded in 1989, annual revenue in 2008 was \$1.6 billion.

Solution Overview

Citrix XenDesktop 3 is the only virtual desktop solution that delivers a high definition user experience over any connection – including low-latency access on the local corporate network to virtual desktops and high latency wide area networks for remote desktop access using Citrix HDX technology.

Citrix XenDesktop is built on an open architecture to offer customers the choice and flexibility of virtualization platform and endpoint devices. Unlike other desktop virtualization (VDI) alternatives, Citrix XenDesktop simplifies desktop management by using a single virtual desktop image to deliver personalized virtual desktops to both virtual and physical devices – in the datacenter or at the endpoint – and enables IT to manage service levels with built-in performance monitoring

Citrix XenDesktop benefits include:

- Reduced cost of application management by centralizing applications.
- Delivery of E-Business Suite 12.1 instantly to users anywhere.
- Improved security with centralized control and secure access to data and applications

Availability

For more information on Citrix XenDesktop and other Citrix application delivery solutions, please visit the Citrix Web site at www.citrix.com or contact a Citrix representative at +1.800.437.7503.

Support

Citrix has a global support organization delivering customer support. Please visit our Web site at www.citrix.com/support or call +1.800.4.CITRIX.

Solution Details

Centralizing and simplifying desktop management across the entire desktop lifecycle, dramatically reduces storage and endpoint costs, and provides the lowest TCO for desktops. Also, by maintaining a single master virtual desktop image in the datacenter, users are provided an up-to-date, pristine virtual desktop at each logon thus drastically reducing patch and upgrade maintenance efforts, and cutting storage costs of hosted virtual desktops by up to 90 percent.

Administrators can use the single virtual desktop image to provision virtual desktops hosted in the datacenter, or stream the virtual desktop to the endpoint to leverage the local processing power. Users are instantly provisioned with a pristine virtual desktop that incorporates the user's personal settings and applications, such as E-Business Suite, regardless of the access device or location – whether accessed while on the corporate network or for remote desktop access. In addition, by using virtual applications companies can enable fewer, simpler virtual desktop images and eliminate system conflicts. This can reduce application regression testing and increase virtual desktop density by up to two times.

Citrix XenDesktop is secure by design. Centralized data, encrypted delivery, a SSL VPN appliance and multi-factor authentication ensure data security and that only the correct users connect to their desktops and that intellectual property is protected and in compliance with regulations.

How XenDesktop Desktop Delivery Works
