

San Francisco 49ers Stay Connected with Citrix

Team leverages digital workspace solutions to maintain operations while sheltering in place

SANTA CLARA, Calif. – April 21, 2020 – When the San Francisco 49ers arrive at the NFL’s first-ever virtual draft this weekend, they will be ready. While many organizations continue to search for ways in which they can keep their operations and employees productive and engaged in the face of work from home and shelter in place mandates, the San Francisco 49ers have already found one. With the help of its innovation partner, [Citrix Systems, Inc.](#) (NASDAQ:CTXS), the 49ers have quickly enabled remote work capabilities across their physically separated team and is leveraging [digital workspace solutions](#) to keep them connected and collaborative.

“When we first began working with Citrix six years ago, we were in search of new ways to streamline our operations and fuel collaboration, both in the back office and out on the road,” said Brent Schoeb, Chief Revenue Officer of the 49ers. “Now, more than ever, we are looking to Citrix to continue to support us in providing secure and reliable remote access to the systems and information we need to do our jobs while we do our part to manage the pandemic by staying home.”

A Secure, Reliable Workspace

Using Citrix [digital workspace solutions](#), the 49ers have created a next-generation digital workspace that enables their employees working from home to be as agile and collaborative as if they were in the office. Leveraging [Citrix® ShareFile](#), the team is able to provide unified access to the applications employees need and prefer to use to get work done anywhere, from any device.

“Citrix ShareFile has been a critical application to stay connected to all members of the 49ers organization,” Schoeb said. “From distributing presentations to sharing design documents, it has provided as much normalcy as possible during these abnormal times.”

Citrix provides a complete range of digital workspace solutions designed to ensure that business operations can continue, through a variety of disruptions. Click [here](#) to learn more about the solutions and how your organization can leverage them to enable remote work and seamless productivity while giving employees the flexibility to work from anywhere in a safe, secure and reliable manner.
