

Coillte Forest Keeps Irish Woodlands Under Control with Citrix® SD-WAN

State agency builds modern network infrastructure to provide seamless, secure and reliable access to applications and information workers need to deliver services

#

FORT LAUDERDALE, Fla. – October 18, 2021 – [Coillte Forest](#) has a big job: manage and ensure the sustainable development and use of more than seven percent of land across Ireland. The state agency relies heavily on technology to do this, and expects it to perform. When its traditional network infrastructure began to falter, Coillte’s IT team saw the forest through the trees and knew it was time for an upgrade. And it turned to [Citrix Systems, Inc.](#) (NASDAQ: CTXS) and its partner, [Edge7 Networks](#), for help in making it.

“We need excellent communications and connectivity to support our services,” said Marc Walsh, ICT Enterprise Architect, Coillte. “And this can be a challenge as many of our sites are located in remote locations where bandwidth is low, inadequate and unreliable.”

Coillte operates 35 sites that include offices, nurseries, and sawmill weighbridges. To overcome the obstacles it faced in connecting them, Coillte set to work building a that would allow it to provide seamless, secure internet access across its sites and substantially improve its network performance and resilience in an efficient and cost-effective manner. And it chose [Citrix SD-WAN](#)

By aggregating multiple circuits across copper, fiber, and 4G/5G, Citrix SD-WAN delivers Using the solution,
