## Section 508 Evaluation Template

Citrix StoreFront 3.12 supports two Receiver for Web user experiences: **Classic** and **Unified**. The differences between the two are described in the [StoreFront 3.12 product documentation](#).

This Voluntary Product Accessibility Template (VPAT) provides guidance on the accessibility characteristics of **Citrix XenApp and XenDesktop 7.15 Receiver for Web – Classic Experience** as of **11/21/2017**.

**Name of Product:** XenApp and XenDesktop 7.15 Receiver for Web – Classic Experience  
**Version:** 3.12

The current version of **Citrix XenApp and XenDesktop 7.15 Receiver for Web – Classic Experience** was tested for conformance with Section 508 of the Rehabilitation Act; specifically, the U.S. Access Board's Technical Requirements. This product was tested as of **November 21, 2017**, and is only valid for the version and date it was tested.

Assistive technology products used as part of testing included Freedom Scientific JAWS 18.0, AI Squared ZoomText 11, Microsoft Windows accessibility features, and keyboard-only control.

<b>Section 1194.21 Software Applications and Operating Systems - Detail</b> <b>VPAT™</b> <b>Voluntary Product Accessibility Template®</b>		
<b>Criteria</b>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
<p>(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.</p>	<p>Supports</p>	<p>Functions can be executed via the keyboard.</p>
<p>(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.</p>	<p>Supports</p>	<p>The web pages do not disrupt or disable activated accessibility features of other applications or the operating system.</p>
<p>(c) A well-defined on-screen indication of the current focus shall be provided that moves</p>	<p>Supports With Exceptions</p>	<p>In some screens, there exists a clear indication of current visual focus, and assistive technology can track focus</p>

<p>among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.</p>		<p>programmatically.</p> <p>In the Account Self-Service screen, when focus lands on the radio buttons, it is not clearly visible.</p>
<p>(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.</p>	<p>Supports</p>	<p>The user interface elements provide the required information, including name, role, and state, to assistive technology.</p>
<p>(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.</p>	<p>Supports</p>	<p>The meaning of images is consistent.</p>
<p>(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.</p>	<p>Supports</p>	<p>Operating system functions are used for displaying text.</p>
<p>(g) Applications shall not override user selected contrast and color selections and other individual display attributes.</p>	<p>Supports</p>	<p>The application does not override user-selected display settings.</p>

<p>(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.</p>	<p>Not Applicable</p>	<p>Animation is not used.</p>
<p>(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.</p>	<p>Supports</p>	<p>Color coding is not used as the sole means of conveying information.</p>
<p>(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.</p>	<p>Not Applicable</p>	<p>The application does not contain functionality to support the changing of display attributes.</p>
<p>(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.</p>	<p>Supports</p>	<p>Flashing or blinking does not occur within the prohibited range.</p>
<p>(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.</p>	<p>Supports</p>	<p>The user interface elements provide the required information, including name, role, and state, to assistive technology.</p>

**Section 1194.22 Web-based Internet information and applications - Detail**  
**VPAT™**  
**Voluntary Product Accessibility Template®**

<b>Criteria</b>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	Supports	Images have alternative text.
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	Not Applicable	Multimedia is not used.
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	Supports	Color is not used as the sole means of conveying information.
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	Supports	Web pages are readable without the use of an associated style sheet.
(e) Redundant text links shall be provided for each active region of a server-side image map.	Not Applicable	Image map links are not used.
(f) Client-side image maps shall be provided instead of server-side image maps except where	Not Applicable	Client and server-side image maps are not used.

the regions cannot be defined with an available geometric shape.		
(g) Row and column headers shall be identified for data tables.	Not Applicable	Data tables are not used.
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	Not Applicable	Data tables with multiple logical levels are not used.
(i) Frames shall be titled with text that facilitates frame identification and navigation	Not Applicable	Frames are not used.
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	Supports	Flickering does not occur within the prohibited range.
(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.	Not Applicable	A text-only page cannot be substituted for an interactive web application.
(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script	Supports	Interface elements can be read by assistive technology.

<p>shall be identified with functional text that can be read by Assistive Technology.</p>		
<p>(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).</p>	<p>Supports</p>	<p>The application provides a link to download the Citrix Receiver application for launching virtual desktops.</p>
<p>(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.</p>	<p>Supports</p>	<p>The user interface elements provide the required information, including name, role, and state, to assistive technology.</p>
<p>(o) A method shall be provided that permits users to skip repetitive navigation links.</p>	<p>Not Applicable</p>	<p>The Receiver for Web - Classic Experience pages do not use repetitive links.</p>
<p>(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.</p>	<p>Supports With Exceptions</p>	<p>The application does have timeouts after a certain amount of inactivity. A warning prompt is displayed to a user who is already logged in; no warning is displayed to a user who is using the Account Self-Service feature (prior to login).</p> <p>The timeout periods can be adjusted in StoreFront; after selecting the store in the main pane, select "Manage Receiver for</p>

		<p>Web Sites” from the Action menu, then choose “Configure”. In “Edit Receiver for Web Site”, choose “Session Settings”.</p>
--	--	--

Note to 1194.22: The Board interprets paragraphs (a) through (k) of this section as consistent with the following priority 1 Checkpoints of the Web Content Accessibility Guidelines 1.0 (WCAG 1.0) (May 5 1999) published by the Web Accessibility Initiative of the World Wide Web Consortium: Paragraph (a) - 1.1, (b) - 1.4, (c) - 2.1, (d) - 6.1, (e) - 1.2, (f) - 9.1, (g) - 5.1, (h) - 5.2, (i) - 12.1, (j) - 7.1, (k) - 11.4.

<p align="center"><b>Section 1194.25 Self-Contained, Closed Products - Detail</b>  <b>VPAT™</b>  <b>Voluntary Product Accessibility Template®</b></p>		
<p align="center"><b>Criteria</b></p>	<p align="center"><b>Supporting Features</b></p>	<p align="center"><b>Remarks and explanations</b></p>
<p>(a) Self-contained products shall be usable by people with disabilities without requiring an end-user to attach Assistive Technology to the product. Personal headsets for private listening are not Assistive Technology.</p>	<p align="center">Not Applicable</p>	<p>This product is not a self-contained, closed product.</p>
<p>(b) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.</p>	<p align="center">Supports with Exceptions</p>	<p>The application does have timeouts after a certain amount of inactivity. A warning prompt is displayed to a user who is already logged in; no warning is displayed to a user who is using the Account Self-Service feature (prior to login).</p> <p>The timeout periods can be adjusted in StoreFront; after selecting the store in the</p>

		main pane, select “Manage Receiver for Web Sites” from the Action menu, then choose “Configure”. In “Edit Receiver for Web Site”, choose “Session Settings”.
(c) Where a product utilizes touchscreens or contact-sensitive controls, an input method shall be provided that complies with §1194.23 (k) (1) through (4).	Not Applicable	This product is not a self-contained, closed product.
(d) When biometric forms of user identification or control are used, an alternative form of identification or activation, which does not require the user to possess particular biological characteristics, shall also be provided.	Not Applicable	This product is not a self-contained, closed product.
(e) When products provide auditory output, the audio signal shall be provided at a standard signal level through an industry standard connector that will allow for private listening. The product must provide the ability to interrupt, pause, and restart the audio at anytime.	Not Applicable	This product is not a self-contained, closed product.
(f) When products deliver voice output in a public area, incremental volume control shall be provided with output amplification up to a level of at least 65 dB. Where the ambient noise level of the environment is	Not Applicable	This product is not a self-contained, closed product.

<p>above 45 dB, a volume gain of at least 20 dB above the ambient level shall be user selectable. A function shall be provided to automatically reset the volume to the default level after every use.</p>		
<p>(g) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.</p>	<p>Supports</p>	<p>Color coding is not used as the sole means of conveying information.</p>
<p>(h) When a product permits a user to adjust color and contrast settings, a range of color selections capable of producing a variety of contrast levels shall be provided.</p>	<p>Not Applicable</p>	<p>The application does not contain functionality support for the changing of color and contrast settings.</p>
<p>(i) Products shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.</p>	<p>Supports</p>	<p>Flickering does not occur in the prohibited range.</p>
<p>(j) (1) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: The position of any operable control shall be determined with respect to a vertical plane, which is 48 inches in length, centered on the operable control, and at the</p>	<p>Not Applicable</p>	<p>This product is not a self-contained, closed product.</p>

<p>maximum protrusion of the product within the 48 inch length on products which are freestanding, non-portable, and intended to be used in one location and which have operable controls.</p>		
<p>(j)(2) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Where any operable control is 10 inches or less behind the reference plane, the height shall be 54 inches maximum and 15 inches minimum above the floor.</p>	<p>Not Applicable</p>	<p>This product is not a self-contained, closed product.</p>
<p>(j)(3) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Where any operable control is more than 10 inches and not more than 24 inches behind the reference plane, the height shall be 46 inches maximum and 15 inches minimum above the floor.</p>	<p>Not Applicable</p>	<p>This product is not a self-contained, closed product.</p>
<p>(j)(4) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the</p>	<p>Not Applicable</p>	<p>This product is not a self-contained, closed product.</p>

<p>following: Operable controls shall not be more than 24 inches behind the reference plane.</p>
