

Citrix Cloud Virtual Apps & Desktops Service Transition Pilot

Deploy your first use case managed from Citrix Cloud

At a Glance

A production pilot environment for evaluating Citrix Cloud as a method for securely delivering and managing applications to various groups within the organization

Services Value

Expert guidance designing the proper Cloud infrastructure for leveraging all the services and capabilities delivered by Citrix Cloud

About Citrix Cloud Virtual Apps & Desktops Service Transition Pilot

The Citrix Cloud Virtual Apps & Desktops Service Transition Pilot engagement helps you fast track your cloud journey by rapidly transitioning a current XenApp use case to a Citrix Cloud Virtual Apps & Desktops Service production pilot. The latest Citrix Virtual Apps & Desktops technologies provide a better end user experience, performance, and security.

When delivered as a service via Citrix Cloud, the platform is always current, operated and maintained by Citrix; allowing you to focus on the policies and the workloads needed to run your business.

During this three-week engagement, Citrix Consulting Services will transition a single Virtual App use case to an evergreen cloud managed environment; and at the same time provide a pilot environment to model further use cases for further use cases on your journey to a Secure Digital Workspace.

Project Scope

- Develop Pilot environment design including list of prerequisites
- Deployment & baseline configuration of an instance of the Citrix Cloud Virtual Apps & Desktops Service
- Deployment of a single resource location either on-premises or in a public cloud with a single use case leveraging your existing Citrix Virtual Apps image
- Remote access made available via Citrix Cloud Gateway Service or on-prem NetScaler VPX devices
- A summary document outlining the configurations deployed and a completed test plan validating the successful deployment

Benefits & Outcomes

- Quick access to the latest Virtual Apps & Desktops technologies
- Option to deploy workloads on-premises or in public cloud
- Familiarity with Citrix Cloud and access to trials of other Citrix Cloud Services
- Valuable shadowing and operational handover time with Citrix Consulting
- Gain validation of existing use cases managed by Citrix Cloud

Prerequisites and Assumptions

- Customer to provide representation from appropriate teams during engagement (e.g. Citrix, Networking, Security, Applications, Operations)
- Customer to provide supported hypervisor capacity or public cloud resources to host workloads
- Customer to provide Citrix Consultant with appropriate access to the customer environment and associated infrastructure.
- Customer to provide existing XenApp image (XenApp software agent removed, and Citrix VDA installed)
- Additional effort may be required to address all customer requirements prior to full production usage

Additional Education

- [CXD-250](#) - Moving to Citrix Virtual Apps & Desktops Service on Citrix Cloud
- [CXD-251](#) - Citrix Virtual Apps & Desktops Service on Microsoft Azure
- [CXD-252](#) - Moving to the Virtual Apps & Desktops Service on Citrix Cloud and Microsoft Azure
