

# Citrix Content Collaboration

Access and share files anytime, anywhere, and on any device—all within a secure, unified digital workspace

Citrix Content Collaboration builds upon Citrix ShareFile, a file sync and share tool, to empower employees to collaborate more efficiently. Delivered as part of a unified digital workspace, it lets you connect to documents and data from anywhere; ensure document security without limiting access; and simplify feedback and approvals. At the same time, you can meet your organization's requirements for security, manageability, and compliance.

The feature matrix below shows which features are available in each subscription plan: Standard, Advanced, and Premium.

Features	Standard	Advanced	Premium
<b>Popular features</b>			
Active Directory and single sign-on (SSO)	•	•	•
Store, backup, and share files securely online	•	•	•
Enable unlimited client users	•	•	•
Connect to existing cloud data repositories	•	•	•
Citrix Files for Outlook, Outlook Online, Gmail (formerly Outlook and Gmail plugin)		•	•
Request and send electronic signatures			•
<b>Included in all plans</b>			
Storage	Unlimited or 0 GB	Unlimited or 0 GB	Unlimited or 0 GB
Custom branding	•	•	•
Mobile applications	•	•	•
Sync	•	•	•
<b>Collaboration</b>			
Edit documents on mobile device	•	•	•
Enable unlimited client users	•	•	•
Add users and unlimited clients to shared files, folders, and workspaces	•	•	•
Co-editing documents with Office 365 (requires Office 365 license)		•	•
Full text search		•	•
Request list of files provided by client			•
<b>File Management</b>			
File versioning	•	•	•
File check-in and check-out	•	•	•
File drop		•	•

Features	Standard	Advanced	Premium
<b>Folder Management</b>			
Folder Q&A		•	•
Folder creation templates		•	•
<b>Workflows</b>			
Feedback and approval workflows		•	•
Custom workflows			•
<b>Security</b>			
Active Directory and single sign-on (SSO)	•	•	•
Two-step verification	•	•	•
Mandatory two-step authentication	•	•	•
Encrypted email		•	•
Hard quotas: Enforce storage quotas		•	•
Secure mobile data wipe		•	•
Device security		•	•
Archiving		•	•
Watermarking (Information Rights Management)		•	•
View-only sharing		•	•
Key management services (KMS) <sup>1</sup>		•	•
CASB integration for data loss prevention (DLP) <sup>2</sup>		•	•
<b>Connectors</b>			
OneDrive for Business	•	•	•
SharePoint Online	•	•	•
Personal cloud storage, e.g., Box, Dropbox, and OneDrive	•	•	•
On-premises data (network shares, SharePoint, and Documentum)		•	•

Features	Standard	Advanced	Premium
<b>Access/mobility</b>			
Citrix Files (replacing ShareFile Drive Mapper, Sync, and Desktop App)	•	•	•
Remote access to securely stored files from any device	•	•	•
Access files stored in customer-managed storage zones	•	•	•
<b>Electronic signatures</b>			
Send document for e-signature			•
Bulk send			•
Type-to-sign			•
Sign on mobile devices			•
Automatic reminders for document signatures			•
Reusable templates (for generating and sending)			•
Integration for secure payment processing on docs			•

<b>Manage tasks and teams</b>			
Activity logs and reports	•	•	•
User management tool	•	•	•
Policy-based administration	•	•	•
Folder invitations		•	•

Features	Standard	Advanced	Premium
<b>Compliance</b>			
HIPAA compliant configuration <sup>3</sup>			•
<b>Integrations</b>			
Developer API	•	•	•

#### Notes

Customers may choose to mix and match license types, but they may not mix storage entitlements. For example, a customer may buy Advanced and Premium licenses for their organization. However, that organization may not purchase Premium 0 GB and Premium Unlimited licenses.

#### References:

1. Feature not enabled in 0 GB packages with on-premises-only storage.
2. Citrix integrates with popular DLP systems that support the ICAP protocol (Symantec Data Loss Prevention, McAfee Total Protection for DLP, and Forcepoint DLP) for customer-managed storage zone deployments to restrict document sharing based on the file's DLP classification. In addition, Citrix supports popular CASB integrations including McAfee Skyhigh Security Cloud, Netskope, Avanan, and Managed Methods to address cloud service risks.
3. HIPAA customers must have a signed BAA in place with Citrix. Workflows and connectors are not supported with HIPAA configurations.
