

Transform your digital workforce into

Go from fast to unstoppable with Citrix Workspace and Microsoft Teams

The modern desktop: Always-on collaboration on every device

Today's workforce is radically changing. Fewer employees are working in traditional office spaces and the number of remote employees has grown exponentially. Everyone is on the same team yet how they all interact and collaborate has been fundamentally altered. The future success of enterprises requires an all-encompassing digital transformation.

Creating a seamlessly-connected IT platform with Citrix Workspace and Microsoft Teams gives employees access to the productivity, communication, and collaboration tools they love, helping them excel at their job. Onsite, remote, or on-the-go, they can interact from any location using any device with all corporate data stored securely in the cloud. Plus, IT administrators will love Citrix automated workflows, real-time analytics, and ability to centrally manage and control corporate data.

Setting the workforce up for success

By 2027 it is estimated that the majority of the U.S. workforce will be remote, with more than one billion hours per week spent working offsite.¹ Employees are everywhere—working on every platform and device—and need to collaborate 24/7 while being productive and efficient.

Setting onsite and distance-based workers up for success requires IT to provide a modern desktop that:

- **Supplies secure remote access with little to no downtime**
- **Delivers Windows, Linux, and Web applications from any public, on-premises, or hybrid cloud environment**
- **Centrally manages all users and smoothly rolls out new software patches and updates**
- **Stores data in a secure location in the cloud with access to real-time insights**

Citrix Workspace integrated with Microsoft Teams and Office 365 offers a fully-featured, native application experience regardless of device. An employee working on their Surface over a local network will have the same accessibility and functionality as a mobile worker using Citrix Workspace on their device.

Everyone can access, edit, and share any type of document regardless of where it is stored—Citrix Content Collaboration, Microsoft OneDrive, SharePoint, or legacy file shares—giving employees the flexibility and tools they need to work smarter and be more productive and collaborative. In addition, every virtualized instance of Teams voice, video, and telephony is optimized by Citrix HDX to ensure the highest quality and most consistent user experience.

Citrix Workspace delivers everything a business needs for Teams

Citrix Workspace helps enterprises set the stage for a successful digital workspace transformation by streamlining the app deployment process, providing universal access to corporate data as well as virtual apps and desktops from any device, and optimizing server scalability to minimize cost.

With the heavy lifting out of the way, IT can focus on delivering the best, most secure way to collaborate. Citrix stores information such as data and chat logs in the cloud, not on devices, giving IT the centralized control over sensitive corporate data that makes their job easier.

Microsoft Teams is growing fast and here to stay

Citrix Workspace transforms the mobile workforce into a virtually connected hub that requires near-constant communication to collaborate. Using Microsoft Teams gives employees the ability to group chat, initiate remote conference calls, meet up, and share files online—all while working alongside Office 365 apps.

Teams is the **fastest growing** business app in Microsoft history with:

13M

daily active users collaborating from over 500,000 organizations, and growing!

3M

people signing up for Office 365 each month

91 *Fortune 100 companies*

relying on Teams to network and interact virtually

Microsoft Teams and the challenges of collaboration tools

Implementing even the most modern collaboration tool usually comes with a few technical considerations IT must address including:

- **Installation, updates, and support**
- **Integrating with existing applications**
- **Device compatibility and management**
- **Network performance tuning**
- **VoIP and video quality of service**
- **Storage of chat files, video recording, and project files**

Citrix Workspace solves for all of this and more, giving IT and workers the best and fastest route to a modern desktop.

Your modern desktop starts with Citrix

Citrix Workspace can deliver virtual apps and desktops from any public cloud including Microsoft Azure, Amazon Web Services, Google Cloud Platform, and Oracle Cloud. It is an intelligent solution that organizes and automates workloads, leading to an increase in the productive effort, capacity, and outcomes of employees.

The Citrix Workspace suite of products—available as a cloud service or traditional software solution—provides virtual apps (Citrix Virtual Apps and Desktops), secure remote access (Citrix Gateway Service), secure connectivity (Citrix SD-WAN), and analytics (Citrix Analytics) to give unique insights on user behavior.

Modern workspaces meet modern collaboration

Citrix HDX Optimization for Microsoft Teams gives enterprises:

- The best onsite and remote user experience
- Tools for modern collaboration including meetings, chat, and sharing
- An easy on-ramp for BYOD
- Clear voice and video quality with HDX RealTime Media Engine
- The ability to maximize your Office 365 entitlements
- Increased security and better server scalability

*“With Citrix we’ve **eliminated redundant infrastructure** and introduced **cost savings**, while also making it **easier for employees** to submit data at the project location in real time.”³*

— David Banger, CIO John Holland Group

Your enterprise is able to regain central control over all users and devices accessing the network by giving IT the management and security tools they need to support the modern workforce. Employees are more engaged, connected, and empowered to get the job done—wherever that may be.

Citrix Workspace plus Teams makes your workforce unstoppable

Creating an unstoppable digital workforce starts with transforming your employees' workspace.

The Citrix Workspace plus Microsoft Teams digital platform integrates data from various sources across multiple applications and environments in the cloud so employees can work, collaborate, and communicate from anywhere, at any time, using any device.

Make your workforce unstoppable—start implementing Citrix Workspace with Microsoft Teams today.
