

To install Citrix Receiver for Windows RT

These instructions apply to the Windows Store version of Windows RT and to Windows 8.

1. Open the store and then select the search icon.

2. Search for Receiver and then click **install**.

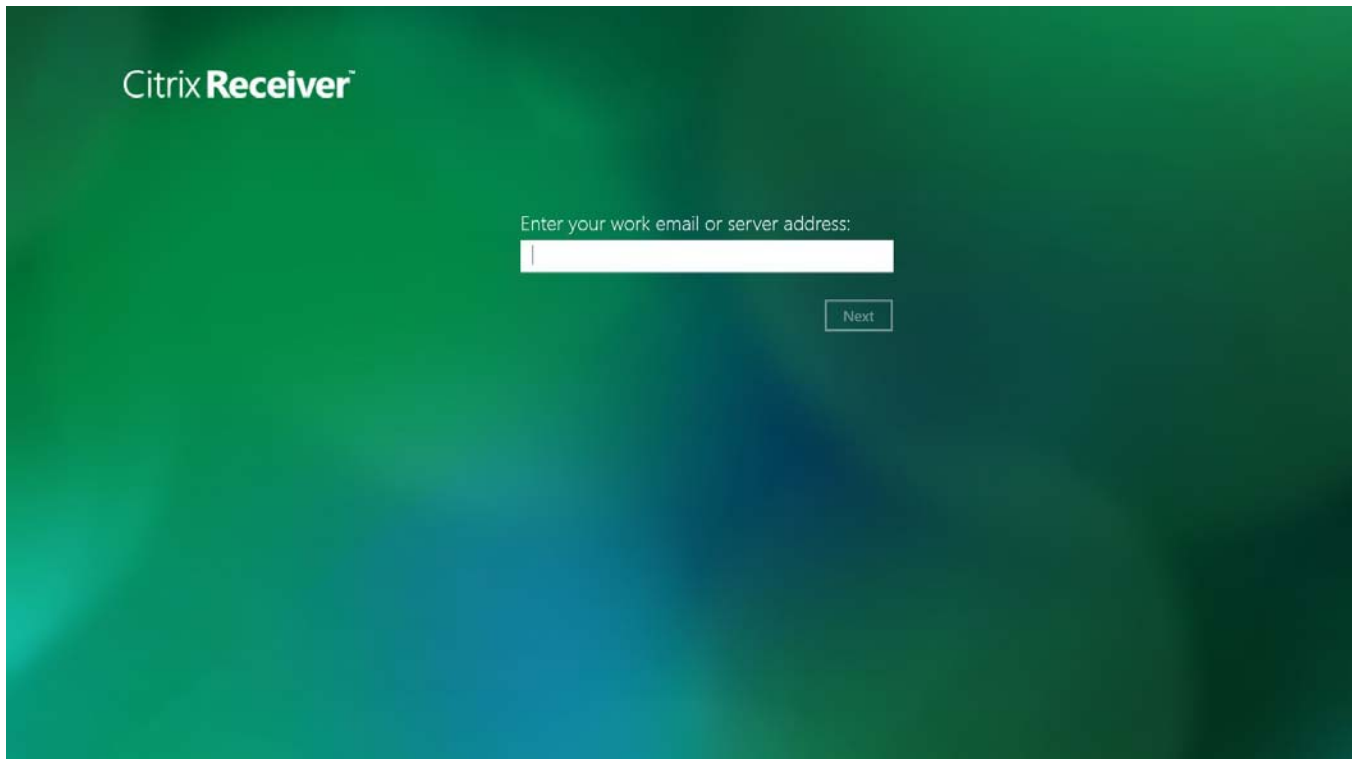

3. Wait for Receiver to download then click to open Receiver.

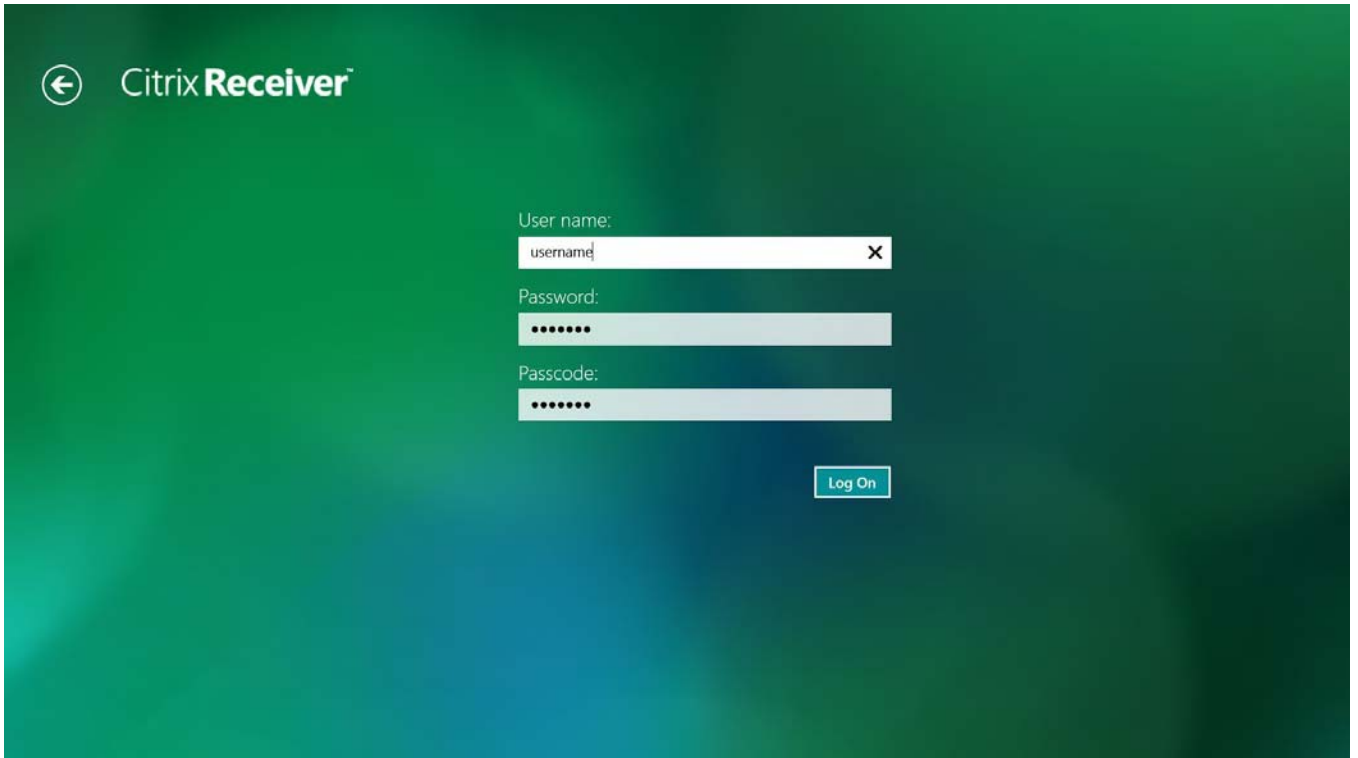

4. Enter your work email or server address and then click **Next**.

Your IT Help Desk or system administrator provides this information.

5. Enter your **User name**, **Password**, and **Passcode** and then click **Log On**.

The image shows the Citrix Receiver login interface. It features a dark green background with a white back arrow icon and the text "Citrix Receiver" in the top left corner. Below this, there are three input fields: "User name:" containing the text "username" with a clear button (X) on the right; "Password:" containing seven black dots; and "Passcode:" containing seven black dots. A "Log On" button is positioned to the right of the passcode field.

To uninstall Citrix Receiver

1. Press and hold the Citrix Receiver icon. Select **uninstall** and then click **yes** to confirm the deletion of Citrix Receiver from your phone.
