4 ways Citrix and Microsoft endpoint management protect your enterprise

Industry and work disruption are the new normal. They’re affecting where, when, and how we work. How can you ensure IT efficiency and productivity, and protect both your organization and employees? We can help you get there. Citrix and Microsoft Endpoint Management provide a secure and integrated solution for remote workforce. Let’s discuss why you need to leverage Citrix and Microsoft’s unified endpoint management. With 40 percent of all organizations deploying Windows 10, most organizations are working remotely. 1

Here’s why you need unified endpoint management from Citrix and Microsoft now more than ever.

Citrix and Microsoft secure the world of remote work together.

To manage and secure their apps across your environment, your remote workforce needs unified endpoint management (UEM). 2

With the right management, you can improve the user experience and increase productivity. By adding Citrix Endpoint Management to your environment, you can create a seamless, single-pane-of-glass management experience for your users.

Microsoft and Citrix deliver a scalable modern desktop experience.

Citrix Endpoint Management offers the widest range of capabilities. For example, Citrix Analytics can provide deep insights for Microsoft or third-party apps from a single pane of glass. This enables you to quickly assess app performance and increase the productivity of your organization.

Citrix Endpoint Management recognized as industry leader.

Citrix and Microsoft secure the world of remote work together. To manage and secure these apps across your diverse environment, Citrix and Microsoft provide a unified endpoint management solution. With a single pane of glass, you can manage all endpoints, devices, and applications. You can also manage applications, devices, and user access to resources.
