

Citrix NetScaler and Cisco Application Centric Infrastructure

Delivering business agility through data center automation

Rapidly address business changes with infrastructure management tools that enable application revisions with uncompromising integration between Citrix NetScaler and Cisco ACI. Adapt to change easily with comprehensive policy-based management of L4-L7 services. Maintain uncompromised performance across multiple applications, even as demands fluctuate, through NetScaler services that work directly with ACI. Reduce administrative costs with centralized, policy-based

management and automation for full-stack provisioning. Implement comprehensive security while ensuring compliance with industry standards using native ACI security in combination with NetScaler security services. Defend the business through a multi-layered, zero-trust, whitelist-based approach to security. Protect the user with a solution that combines policy-based management with SSL, VPN, and application firewalls.

Citrix NetScaler and Cisco ACI—benefits of our joint solution

Agile

- Rapidly address business changes with infrastructure management tools that enable application revisions with uncompromising integration between NetScaler and ACI
- Deploy rapidly by easily propagating policies and services across physical, virtual, and container environments
- Adapt to change easily with comprehensive policy-based management of L4-L7 services
- Improve system reliability with monitoring services that intuitively present network health information to enable proactive network management.

Scalable

- Maintain superior performance across multiple applications, even as demands fluctuate, through NetScaler services that work directly with ACI
- Optimize infrastructure assets by using multiple load-balancing techniques
- Enhance application performance using data caching techniques that lower the overhead associated with repeated content demands
- Reduce administrative costs with centralized, policy-based management and automation for full-stack provisioning

Secure

- Implement comprehensive security while ensuring compliance with industry standards using native ACI security in combination with NetScaler security services
- Defend the business through a multi-layered, zero-trust, whitelist-based approach to security
- Protect the user with a solution that combines policy-based management with SSL, VPN, and application firewalls
- Maintain compliance through policy control, micro-segmentation, and multi-tenancy services that simplify management and administration

About Citrix

Citrix (NASDAQ:CTXS) is leading the transition to software-defining the workplace, uniting virtualization, mobility management, networking and SaaS solutions to enable new ways for businesses and people to work better. Citrix solutions power business mobility through secure, mobile workspaces that provide people with instant access to apps, desktops, data and communications on any device, over any network and cloud. With annual revenue in 2014 of \$3.14 billion, Citrix solutions are in use at more than 330,000 organizations and by over 100 million users globally. Learn more at www.citrix.com.

About Cisco

Cisco designs and sells broad lines of products, provides services and delivers integrated solutions to develop and connect networks around the world. Over the last 30 years, we have been the world's leader in connecting people, things, and technologies, changing the way the world works, lives, plays, and learns in an increasingly digital world.
