

Citrix Workflow and Microapp Creation Services

Expand your existing Citrix Workspace environment with additional data integrations, notifications, and microapps

Consulting methodology

Plan Implement Monitor Optimize

Customer Value

Expand functionality of Citrix Workspace with additional data integrations and microapps, leveraging our highly experienced team.

About Citrix Workflow and Microapp Creation Services

As a next step toward expanding Citrix Workspace workflows, our Microapp Creation Service is designed to accelerate the deployment of additional integrations and microapps within your requirements and specifications to an existing Citrix cloud environment.

We'll work with you to review your specifications for new microapps and integrations. Our dedicated team will then build, test, and pilot them into your existing environment. We can also work with you to explore the feasibility of new custom integrations to additional systems of record, so you can further realize the benefits of Citrix Workspace workflows.

Prerequisites and Assumptions

In order to take advantage of Microapp Creation Services, we will need detailed Microapp specifications and success criteria. This can be obtained by completing a Citrix Workspace Workflow Assessment (WA04), Data Integration Essentials, or a Workflow Accelerator Pack.

Available Bundles

Data Integration & Microapp Creation Service	Data Integration Essentials	Microapp Essentials	Workflow Accelerator Pack
\$20,160/mo	\$6,720	\$2,880	\$46,400
SKU: 4071799	SKU: 4071797	SKU: 4071798	SKU: 4072030
Includes Data Integration Essentials	Includes one (1) custom or Out-of-the-Box Data Integration or Custom HTTP	Includes one (1) Notification, Action, and/or Page bundle	Includes up to four (4) Data Integration Essentials
