Section 508 Evaluation Template

This Voluntary Product Accessibility Template (VPAT) provides guidance on the accessibility characteristics of **Citrix WorxWeb for iOS** as of July 31, 2015.

Name of Product: Citrix WorxWeb for iOS

Version: 10.0.7

The current version of **Citrix WorxWeb for iOS** was tested for conformance with Section 508 of the Rehabilitation Act, specifically, the US Access Board's Technical Requirements. This product was tested as of **July 31, 2015**, and is only valid for the version and date it was tested.

Assistive technology products used as part of testing included iOS 8.04 accessibility features: VoiceOver screen reader, Zoom screen magnification, invert colors, bold text and large font.

Section 1194.21 Software Applications and Operating Systems - Detail
VPAT™
Voluntary Product Accessibility Template®

| Criteria | Supporting Features | Remarks and explanations |
|---|----------------------------|---|
| (a) When software is designed to run on a system that has a | Supports with | Some functions of the application are keyboard operable. The “More Info” button |

| | | |
|--|------------|--|
| keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually. | Exceptions | and the opening of tabs are not operable with VoiceOver gestures or an external keyboard. |
| (b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer. | Supports | The application does not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. |
| (c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes. | Supports | There exists a clear indication of current visual focus, and assistive technology can track the focus programmatically. |
| (d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available | Supports | Sufficient information is provided for user interface elements, including name, role, and state information. |

| | | |
|---|--------------------------|---|
| to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text. | | |
| (e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance. | Supports | The meaning of images is consistent. |
| (f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes. | Supports | Operating system functions are used for displaying text. |
| (g) Applications shall not override user selected contrast and color selections and other individual display attributes. | Supports with Exceptions | The application honors the "Inverted Colors" iOS display setting. The application does not honor the "Large Text" and "Bold text" iOS display settings. |
| (h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user. | Not Applicable | Animation is not used. |
| (i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or | Supports | Color coding is not used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element in some |

| | | |
|--|----------------|--|
| distinguishing a visual element. | | instances. |
| (j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided. | Not Applicable | The application does not contain functionality to support the changing of display attributes. |
| (k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz. | Supports | Flashing and blinking do not occur in the prohibited range. |
| (l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues. | Supports | Sufficient information is provided for user interface elements, including name, role, and state information. |

Section 1194.22 Web-based Internet information and applications - Detail
VPAT™
Voluntary Product Accessibility Template®

| Criteria | Supporting Features | Remarks and explanations |
|--|----------------------------|--|
| (a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element | Supports | Graphical buttons have accessible name labels. |

| | | |
|--|----------------|--|
| content). | | |
| (b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation. | Not Applicable | This product does not have multimedia presentations. |
| (c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup. | Supports | Color coding is not used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element. |
| (d) Documents shall be organized so they are readable without requiring an associated style sheet. | Not Applicable | This product is not a web application. It does not use style sheets. |
| (e) Redundant text links shall be provided for each active region of a server-side image map. | Not Applicable | This product is not a web application. It does not use server-side links. |
| (f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape. | Not Applicable | This product is not a web application. It does not use client- or server-side links. |
| (g) Row and column headers shall be identified for data tables. | Not Applicable | Tables are not used. |
| (h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or | Not Applicable | Tables are not used. |

| | | |
|--|----------------|--|
| column headers. | | |
| (i) Frames shall be titled with text that facilitates frame identification and navigation | Not Applicable | Frames are not used. |
| (j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz. | Supports | Flickering does not occur in the prohibited range. |
| (k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes. | Not Applicable | This product is not a web application. |
| (l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology. | Not Applicable | This product is not a web application. Scripting languages are not used. |
| (m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) | Not Applicable | This product is not a web application. It does not use plug-ins. |

| | | |
|--|----------------|--|
| through (l). | | |
| (n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues. | Supports | Sufficient information is provided for user interface elements, including name, role, and state information. |
| (o) A method shall be provided that permits users to skip repetitive navigation links. | Not Applicable | This product is not a web application. It does not have links that need to be skipped. |
| (p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required. | Not Applicable | Timed responses are not required. |

Note to 1194.22: The Board interprets paragraphs (a) through (k) of this section as consistent with the following priority 1 Checkpoints of the Web Content Accessibility Guidelines 1.0 (WCAG 1.0) (May 5 1999) published by the Web Accessibility Initiative of the World Wide Web Consortium: Paragraph (a) - 1.1, (b) - 1.4, (c) - 2.1, (d) - 6.1, (e) - 1.2, (f) - 9.1, (g) - 5.1, (h) - 5.2, (i) - 12.1, (j) - 7.1, (k) - 11.4.

| Section 1194.25 Self-Contained, Closed Products - Detail VPAT™ Voluntary Product Accessibility Template® | | |
|---|----------------------------|--|
| Criteria | Supporting Features | Remarks and explanations |
| (a) Self contained products shall | Not | This product is not a self-contained, closed |

| | | |
|--|----------------|---|
| be usable by people with disabilities without requiring an end-user to attach Assistive Technology to the product. Personal headsets for private listening are not Assistive Technology. | Applicable | product. |
| (b) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required. | Not Applicable | A timed response is not required. |
| (c) Where a product utilizes touchscreens or contact-sensitive controls, an input method shall be provided that complies with §1194.23 (k) (1) through (4). | Not Applicable | This product is not a self-contained, closed product. |
| (d) When biometric forms of user identification or control are used, an alternative form of identification or activation, which does not require the user to possess particular biological characteristics, shall also be provided. | Not Applicable | This product is not a self-contained, closed product. |
| (e) When products provide auditory output, the audio signal shall be provided at a standard signal level through an industry standard connector that will allow for private listening. The product must provide the ability to interrupt, pause, and restart the audio at anytime. | Not Applicable | This product is not a self-contained, closed product. |

| | | |
|--|----------------|--|
| (f) When products deliver voice output in a public area, incremental volume control shall be provided with output amplification up to a level of at least 65 dB. Where the ambient noise level of the environment is above 45 dB, a volume gain of at least 20 dB above the ambient level shall be user selectable. A function shall be provided to automatically reset the volume to the default level after every use. | Not Applicable | This product is not a self-contained, closed product. |
| (g) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element. | Supports | Color coding is not used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element. |
| (h) When a product permits a user to adjust color and contrast settings, a range of color selections capable of producing a variety of contrast levels shall be provided. | Not Applicable | The application does not contain functionality support for the changing of color and contrast settings. |
| (i) Products shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz. | Supports | Flickering does not occur in the prohibited range. |
| (j) (1) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the | Not Applicable | This product is not a self-contained, closed product. |

| | | |
|---|-----------------------|--|
| <p>following: The position of any operable control shall be determined with respect to a vertical plane, which is 48 inches in length, centered on the operable control, and at the maximum protrusion of the product within the 48 inch length on products which are freestanding, non-portable, and intended to be used in one location and which have operable controls.</p> | | |
| <p>(j)(2) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Where any operable control is 10 inches or less behind the reference plane, the height shall be 54 inches maximum and 15 inches minimum above the floor.</p> | <p>Not Applicable</p> | <p>This product is not a self-contained, closed product.</p> |
| <p>(j)(3) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Where any operable control is more than 10 inches and not more than 24 inches behind the reference plane, the height shall be 46 inches maximum and 15 inches minimum above the floor.</p> | <p>Not Applicable</p> | <p>This product is not a self-contained, closed product.</p> |

| | | |
|--|----------------|---|
| (j)(4) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Operable controls shall not be more than 24 inches behind the reference plane. | Not Applicable | This product is not a self-contained, closed product. |
|--|----------------|---|

Section 1194.31 Functional Performance Criteria - Detail
VPAT™
Voluntary Product Accessibility Template®

| Criteria | Supporting Features | Remarks and explanations |
|---|----------------------------|--|
| (a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided. | Supports with Exceptions | The application is partially keyboard (VoiceOver) operable. See 1194.21(d) for details. |
| (b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided. | Supports with Exceptions | The application may be used without visual acuity greater than 20/70 when combined with screen magnification assistive technology, with some exceptions. See 1194.21(g) for details. |

| | | |
|--|--------------------------|--|
| (c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided | Supports | The application does not require user hearing to operate or for information retrieval. |
| (d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided. | Supports | The application does not require user hearing to operate or for information retrieval. |
| (e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided. | Supports | User speech is not required for operations. |
| (f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided. | Supports with Exceptions | The application is partially keyboard accessible. |

Section 1194.41 Information, Documentation and Support - Detail
VPAT™
Voluntary Product Accessibility Template®

| Criteria | Supporting Features | Remarks and explanations |
|---|----------------------------|---|
| (a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge | Supports | Product documentation is available in accessible electronic format. |
| (b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge. | Supports | Product documentation is available in accessible electronic format. |
| (c) Support services for products shall accommodate the communication needs of end-users with disabilities. | Supports | Citrix offers phone, online and email support. |
