

Secure the work of healthcare

Citrix provides a unified, clinically aware digital foundation that serves as the connective tissue for the modern health system, moving organizations beyond tactical virtualization toward a resilient model that secures the work of care delivery.

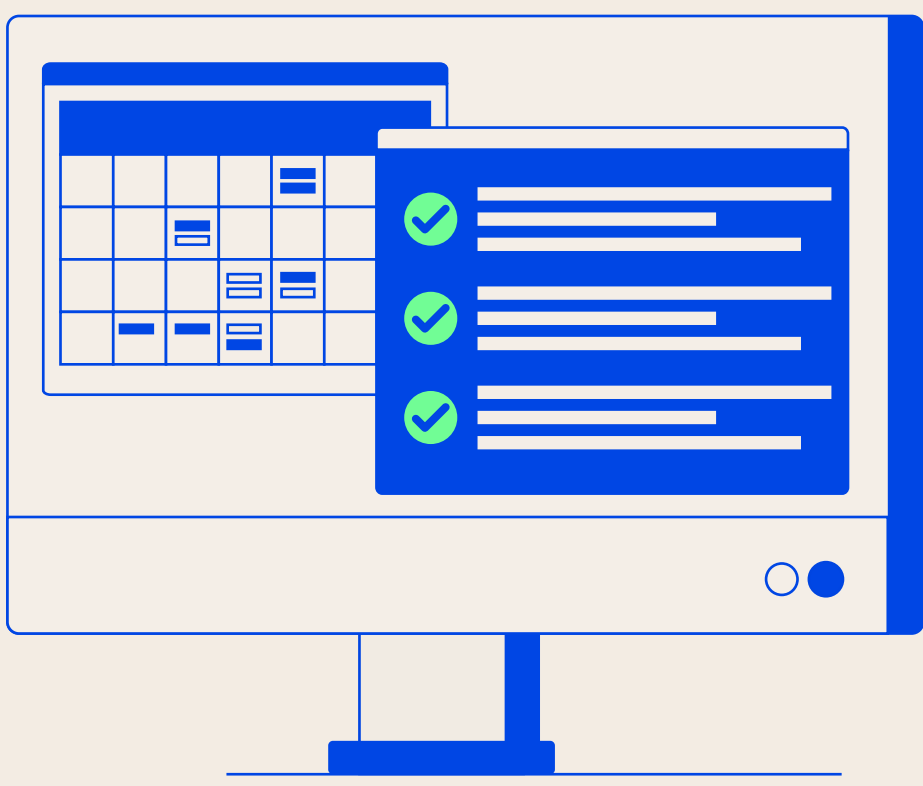

A high performance platform that meets the needs of the entire care continuum

Delivering continuity of care

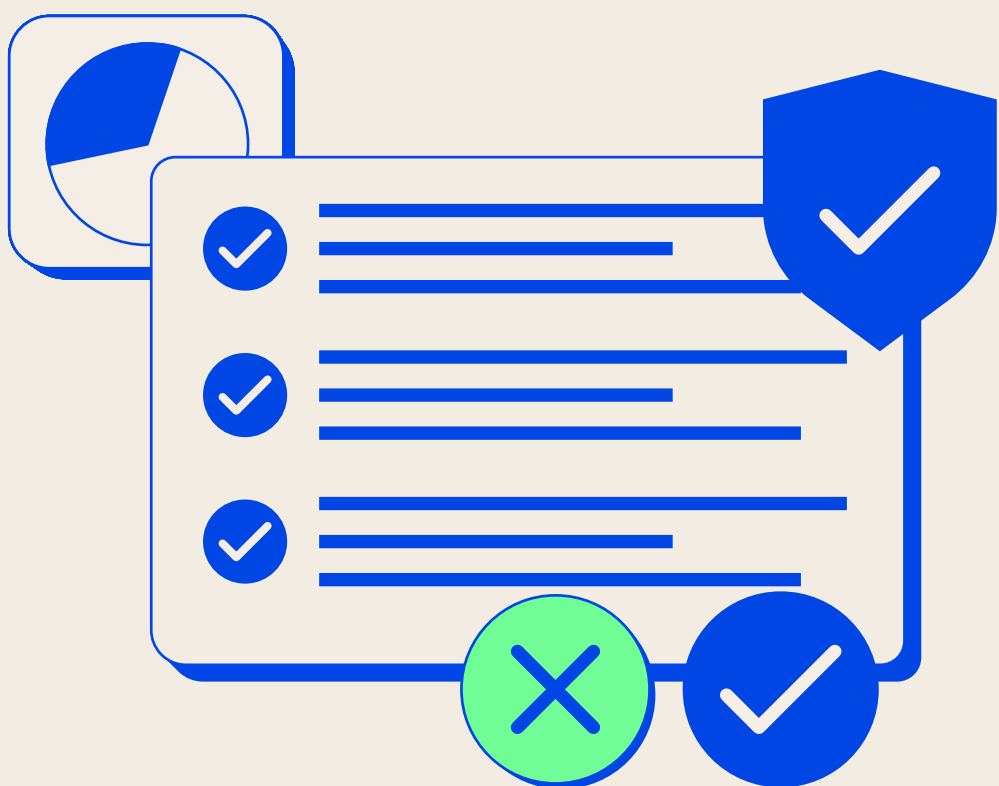

- ✓ Data center and EHR integrity ensure a secure foundation for all patient records and imaging.
- ✓ Redefine resiliency by ensuring technology is always accessible at the bedside.
- ✓ Limit the impact of hardware failures, natural disasters, or cyber-attacks through a foundation that shields clinical workflows.

Strategic cost optimization

Replace expensive vendor sprawl and licensing contracts with a single platform.

Lower operational overhead and empower your IT leaders to manage the entire organization from one secure digital foundation.

Shift IT spend away from maintaining legacy technical debt and toward improved care and innovation.

Accelerated M & A

✓ Onboard acquired physician groups and facilities in days, not months.

✓ Accelerate the time-to-value of every integration by decoupling clinical workflows from local hardware.

✓ Enforce a consistent, zero-trust security standard across the entire expanded enterprise.
